OBJECTIVE SUMMARY

I am currently a computer science major in my junior year at University of Houston with the plan of receiving a bachelors degree. I am looking to improve my knowledge in python libraries and web development languages. I hope to work with a focus on machine learning and AI.

EDUCATION

College of the Mainland   Texas City, TX
Associates of Science in Computer Science - 3.62 GPA   *August 2023 - May 2025*

University of Houston   Houston, TX
Bachelors of Computer Science   *August 2025 - May 2027*

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS, SQL
Developer Tools: Git, VS Code, Visual Studio, PyCharm, Eclipse
Libraries: pandas, Matplotlib

PROJECTS

Travel Website | *HTML/CSS, Express React, NodeJS, MongoDB*   February 2024
- Worked with a team to develop a web application using the MERN development stack
- Used MongoDB to store user information in a safe database
- Implemented CSS Tailwind to provide a user-friendly design
- Used GitHub to collaborate with team members

EXTRACURRICULARS

Founder and President of COM Coding Club   Texas City, TX
College of the Mainland   *August 2023 - 2025*
- Created group projects on a weekly basis.
- Held in-school coding competitions with cash prizes.
- Attended Texas hackathons to both learn and compete.

WORK EXPERIENCE

Math tutor/Cloud data management   February 2024 – May 2025
College of the Mainland   *Texas City, TX*
- Created detailed lesson plans for each student that shed light on student needs versus what the student already knows.
- Scheduled students using an automated messaging system on a website that I created.
